

## MAX Modular Panel

Ultra Base MAX combines the trusted features of Ultra Base Systems with a cutting-edge shock-absorbing membrane for enhanced safety, performance, and superior drainage. Its patented "Drop-'N-Lock" technology streamlines installation, delivering unmatched innovation in the synthetic turf industry.

	Dimensions	39.375" x 29" x 1.125" (7.8 lbs.) 7.93 sq. ft.
	GMAX	117 - No turf/no fill Up to 80 with turf * <small>*Results may vary based on turf and infill</small>
	Vertical Drainage	754.3 inches per hour
	Storage Capacity	.34 gallons
	HIC Impact Attenuation	1.0 m
	Vertical Deformation	5.6 mm - Without Turf or Infill
	Do It Yourself	Quick install in hours not days
	Construction	Top layer: Drainage holes and patented turf barbs Bottom layer: Shock absorbing membrane
	Recyclable	Made from 100% Recyclable materials.
	Warranty	Limited Lifetime Warranty

### Quicker Fields

The need for less infill means lower turf heights and faster speeds

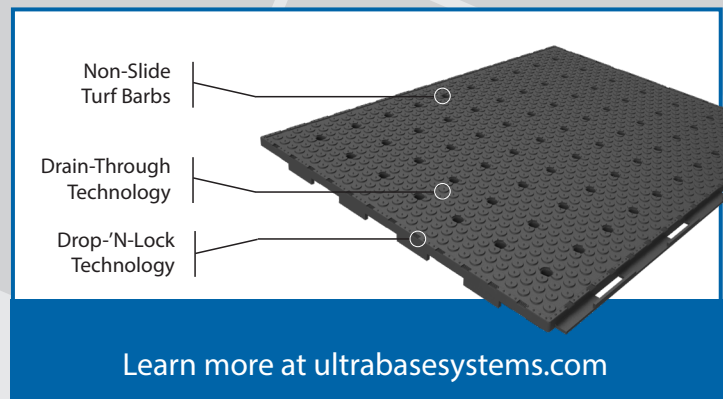

### Economical Choice

Most cost effective option compared to pouring concrete

### Customizable Safety

Change the depth of the Shock absorbing membrane according to fall height needed

### Recommended Uses:

Football

Soccer

Playgrounds

Multi-Sport

**Additional Facts:**

Connection System	Patented "Drop-'N-Lock" system allowing for quick installation
Profile	Top: Non-Slide Turf Barbs Bottom: State of the Art Shock Absorbing Membrane
Nonslip Turf System	The 3000 patented turf barbs per panel hold turf in place
Materials	Proprietary blend of Polypropylene and other materials

**Available Colors:**

Black
