

ULTRA BASE
SYSTEMS

LANDSCAPE

SAFETY

THE SAFE FOUNDATION FOR A PERFECT LANDSCAPE

BENEFITS

- ADA Compliant
- Perfect planarity prevents trips zones
- Turf stays in place under foot
- Vehicle friendly
- Easy to move

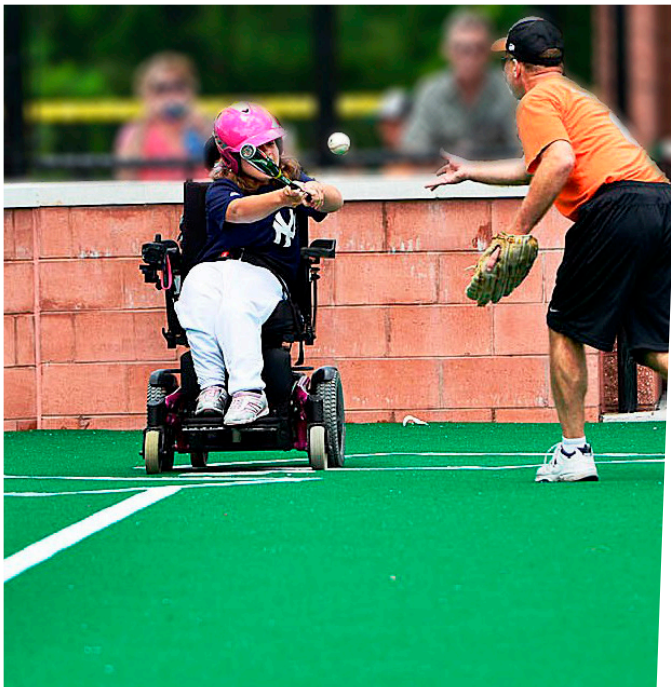

FEATURES:

- Panels align perfectly maintaining an even, safe surface
- Turf barbs reduce turf slide during activities
- Water removed from turf due to rapid horizontal and vertical drainage
- Structural design provides heavy rolling load capacity
- Lightweight design perfect for load restricted rooftop installations
- Engineered to meet ADA standards for planarity and load capacity

ULTRA BASE IN ACTION

The structural capacity of Ultra Base makes it the perfect choice for quick and safe landscape installations from your front yard to the neighborhood park. The revolutionary panel design allows accessibility by all despite physical challenges. Our patented interlocking design feature ensures perfect planarity from panel to panel eliminating the risk of uneven alignment resulting in trip zones.

CONSISTENT PERFORMANCE

PERFECT YEAR ROUND PERFORMANCE

BENEFITS

- Conforms to landscape contours
- Rooftop friendly
- Smooth transition from panel to panel
- Overcomes sub base irregularities
- Predictable ball bounce and ball roll
- Turf stays put regardless of installation size or location
- Accepts heavy loads

FEATURES:

- Install directly on a rooftop or elevate above the roof's surface with pedestals or joists
- Patented interlocking design ensures perfect, no trip planarity panel to panel
- Structurally engineered to span over troublesome sub base irregularities
- Installed panels create a perfect planar covering for any recreational leisure activity
- Patented turf barbs help lock the turf in place to prevent sliding
- Engineered to accommodate landscaping and service vehicles
- Engineered to conform to terrain while mimicking what Mother Nature created

ULTRA BASE IN ACTION

Sod cut, grade and compact, install the fabric and panels--it's that easy to create a level of consistent performance and visual perfection like never before. Transform any space into a professional work of art with simple DIY skills.

INSTALLATION

WE'VE NEVER MET AN INSTALLATION WE DIDN'T LIKE

BENEFITS

- More square feet installed per day equals more revenue
- Reduces heavy construction requirements
- No site limitations
- Panels cut easily to any shape imaginable
- Perfect for rooftops and balconies
- Easy to maneuver to any job site

FEATURES:

- Time is money and Ultra Base saves time
- Perfect results for the skilled installer or weekend craftsman
- Any size, any shape, anywhere
- Lightweight yet structurally sound--the perfect combination for any rooftop, balcony or weight challenged location
- Move the panels a truckload at a time or piece by piece up the stairs
- Replace volumes of rock base with a scientific solution
- Installing turf directly to the panels not only saves money but ensures proper fit and appearance
- Landscape spikes move. Ultra Base panels don't, even in the smallest of areas

ULTRA BASE IN ACTION

Panels and turf are easily installed around existing rock borders, trees, and pathways by simply cutting the panels with tools found in any homeowner's garage. Turf fastens directly to the outer panel edge making small decorative areas structurally sound and easy to maintain.

DRAINAGE

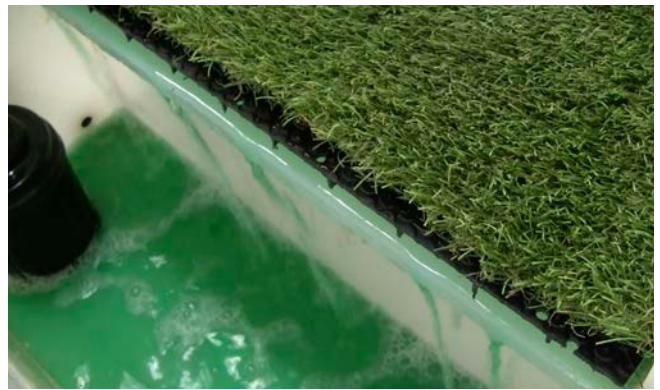

ELEVATE YOUR INSTALLATION TO A NEW LEVEL

BENEFITS

- High panel flow capacity reduces unwanted runoff
- Water storage capacity in each panel
- Horizontally directs water where you want it
- Valuable rainwater can be collected
- Keeps kids and pets clean

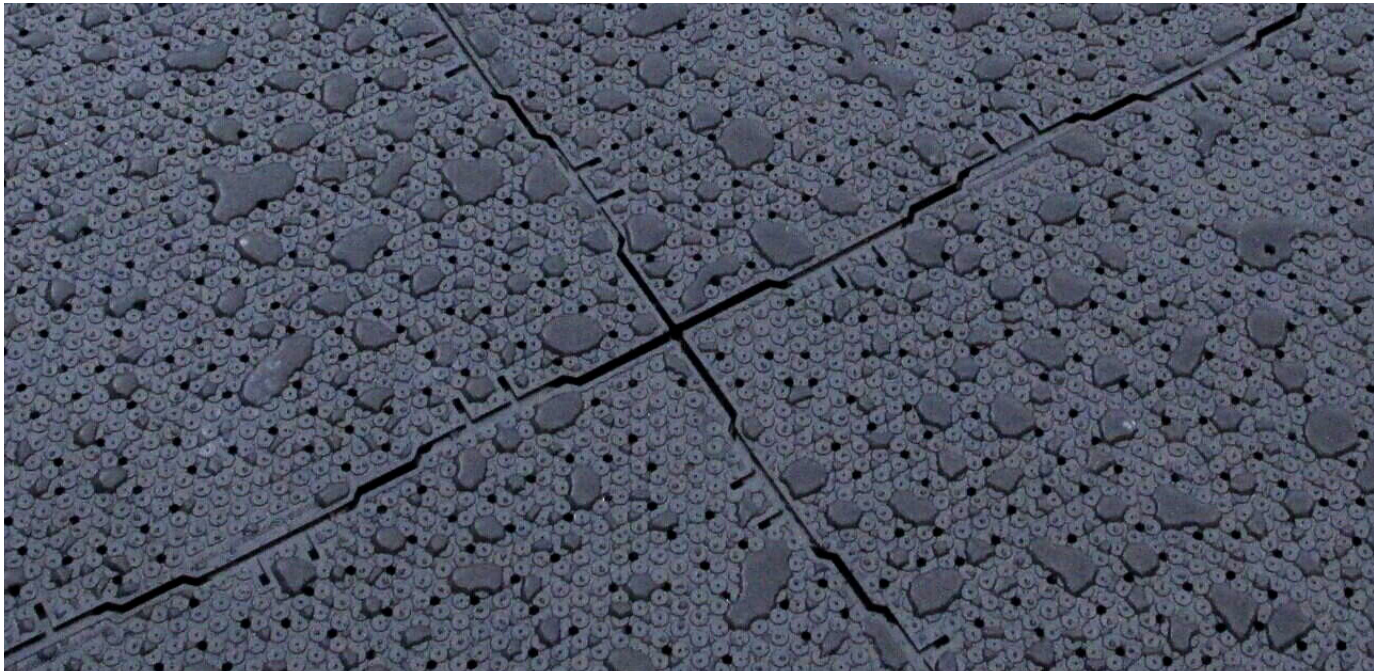

FEATURES:

- Water flows through the panel and into the ground just like natural soil conditions
- Water is stored under the panel while naturally percolating into the ground
- Horizontal drainage allows for directional flow of water to awaiting drain systems
- Engineered flow design allows for water to be collected and reused
- No water, no mud, no mess

ULTRA BASE IN ACTION

Properly perforated turf combined with the high flow Ultra Base panels removes rainwater from the family fun time or commercial activities and into the awaiting sub grade. Just like Mother Nature intended.

LOAD BEARING

SUPPORTS LIFE'S DAILY ACTIVITIES

BENEFITS

- Supports high residential or commercial traffic
- Properly installed panels and turf systems support the load of residential and commercial maintenance equipment
- Panels bridge uneven sub bases
- Ultra Base panels reduce and/or eliminate the need for an outdated compacted rock base
- Perfectly flat or contoured bases are easily achieved with Ultra Base panels

FEATURES:

- The hexagonal cell structure distributes loads evenly across the panel surface
- Manufactured and engineered from high impact and high strength polymers
- Geometric design spans sub base imperfections
- Huge homeowner advantages in eliminating unwanted excessive construction practices
- Mimics the feel underfoot of a perfectly manicured yard or park

ULTRA BASE IN ACTION

The patented Ultra Base system is designed to replace or minimize the need for outdated and unnecessary stone base work while providing all the strength and support for any residential or commercial activity. Host a concert, hold a carnival, or even build a temporary ice rink, it has all been done before with Ultra Base.

COST SAVINGS

THE BEST BANG FOR YOUR BUCK

BENEFITS

- Dramatically simplifies residential and commercial installations
- Less material, fuel and labor required
- Ultra Base will outlast any turf
- Build it today, move it tomorrow. You will never lose your investment.

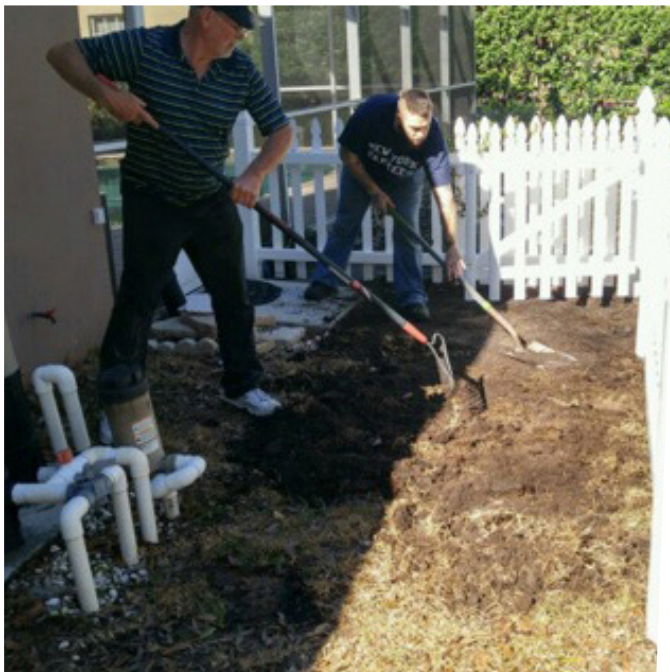

FEATURES:

- Panels do not need to be removed and repositioned when a new turf is installed
- From lawns to rooftops, pavers to patios with one easy system
- Patented technology manufactured with state-of-the-art processes
- Install it today. Relocate and reuse tomorrow.
- Panels stay looking new during use, reuse or relocation
- Eliminating a stone base allows for an easy return to natural grass
- Manufactured from environmentally friendly long-lasting polymeric blends

ULTRA BASE IN ACTION

Minimal ground preparation allows for an easy transformation of any commercial or residential space into a maintenance free synthetic turf environment. Panel technology allows for the optional return back to natural grass or the family garden without excessive effort.

SUSTAINABILITY

HELPING TO SAVE THE EARTH—
ONE PANEL AT A TIME

BENEFITS

- 100% post-consumer content in every panel
- Responsibly manufactured with environmentally safe, family and pet friendly material
- Reduces landfill waste
- 100% Recyclable

FEATURES:

- Made from 100% recycled and recyclable material
- Installation requires far less fuel-consuming equipment reducing carbon footprint
- Incorporating Ultra Base panels into your project reduces landfill waste

ULTRA BASE IN ACTION

Nothing is more satisfying than to see a product that was destined for a landfill now being transformed into a recreational and leisure living space benefiting the lives of those interacting with our panel system.
